

Füllmexx®

Sandbag filling made easy

Description The Füllmexx® is a sandbag filling funnel for manually filling sandbags.

Filling sandbags has always been hard work. The Füllmexx® makes filling sandbags much easier and is therefore an ideal addition to modern flood protection systems.

The Füllmexx® is fitted with a sandbag, guided into the sand with a forward movement and tilted so that the sand slides into the bag. The sandbags are filled 2/3 full thanks to a precise filling limit on the front part of the Füllmexx®. Thanks to the sophisticated system and the specially developed ergonomic geometry, sandbags can be filled with the Füllmexx® with much less effort, which enables longer staff deployment and guarantees a much larger sandbag yield in a shorter time.

Thanks to the Füllmexx®, one person can fill 10 sandbags in just 5 minutes.

Advantages

- Immediately ready for use
- No electricity required
- Low weight
- Low effort
- Extremely robust
- Very long service life (UV, frost, heat resistant)
- Easy to clean (just rinse with water)

Application areas

We recommend the Füllmexx® wherever sandbags need to be filled manually.

Assembly

Not required. The Füllmexx® is a device that consists of a single piece and does not require any mechanical elements.

Storage Transport

Füllmexx® sandbag filling funnels can be stacked inside each other and take up little space during transport and storage.

Dimensions

Dimensions:

- Height: 465 mm
- Diameter top: 315 mm
- Diameter bottom: 160mm

Weight

Weight per unit:

- 1.5kg

Material

Polystone® G HD black

Color

Black
